

Mark Mathews

(602) 318-7659 | mark.mathews.work@gmail.com | github.com/Mathews41

Summary

Full-Stack Software Engineer and Technical Founder with 3+ years of experience delivering scalable, production-grade applications using AI-driven development workflows. Skilled in building backend systems, mobile apps, and cross-platform solutions with TypeScript, Node.js, Flutter, and Firebase. Proven success leading projects end-to-end, optimizing architectures for performance, and automating development pipelines with AI tools.

Technical Skills

Languages: TypeScript, JavaScript, Dart | Frameworks: Node.js, React, Next.js, Flutter | Databases: Firestore, MongoDB, PostgreSQL | Tools: Git, Jest, REST APIs, Tailwind CSS | Other: AI-Assisted Development, Agile, Cloud Functions

Professional Experience

42Chat - Full-Stack Engineer (AI & API Development)

June 2022 - June 2024

- Led API integrations for 5-20 concurrent enterprise events, improving efficiency by 35%.
- Built scalable RESTful APIs with Node.js and TypeScript for real-time event platforms.
- Developed tools empowering non-technical users to configure complex workflows independently.
- Migrated backend from MongoDB to Firebase, enabling seamless horizontal scaling.
- Introduced AI-based process automations, reducing internal setup time by 20%.

42Chat - Junior Full-Stack Developer (APIs & Chatbots)

Oct 2021 - June 2022

- Developed and optimized AI chatbot systems for large-scale enterprise events.
- Focused on real-time data performance, backend optimization, and API efficiency.
- Collaborated on cross-team initiatives to improve chatbot scalability and reliability.

Trigger Picker - Founder & AI-Focused Lead Developer

Oct 2020 - Present

- Built an AI-coded cross-platform app using Flutter, Firebase, and Dart.
- Automated inventory matching, schema generation, and user flows with AI-driven development.
- Designed and deployed real-time backend systems with Firebase Cloud Functions.
- Applied LLM-driven code assistance to accelerate feature delivery and backend scalability.

Projects

Trigger Picker - Cross-platform application matching users to optimized builds, powered by AI-assisted development workflows. Designed for real-time inventory updates, scalable backend operations, and fully automated customization experiences.

Other

English (fluent), Norwegian (intermediate) | Passionate about AI, scalable backends, and system optimization
